Artificial Intelligence Governance Template Initiative (AIGTI) Mission-Readiness Program

Removing Barriers to American Leadership in Artificial Intelligence

29 October 2025
Presented by:
Sean Kerr, CEO Novawerke AI
Lee Popkin, Director, PMO Novawerke AI

Novawerke AI

The Federal AI Innovation Gap

America leads in innovation—but **lags in coordination**.

➢ [EO 14179](#) and [OMB M-25-21](#) mandates control and transparency.
➢ Across government, AI programs appear compliant but lack a common standard.
➢ Each agency uses its own templates, vocabulary, and dashboards—creating costly inefficiency and risk.
➢ The result is the ***illusion*** of compliance: paperwork without accountability, oversight without alignment, lack of legal enforcement.

Standardization is not bureaucracy—it's liberation.

Fragmentation Creates Operational Risk

➢ **Slower innovation cycles.**

➢ **Redundant audits and duplicated reports.**

➢ **Missed opportunities for coordination and savings.**

Standardization Enables Mission Readiness

➢ **Align agencies to a shared AI governance language.**
➢ **Accelerate compliance, efficiency, and innovation.**
➢ **Reinforce American AI sovereignty through consistent reporting.**
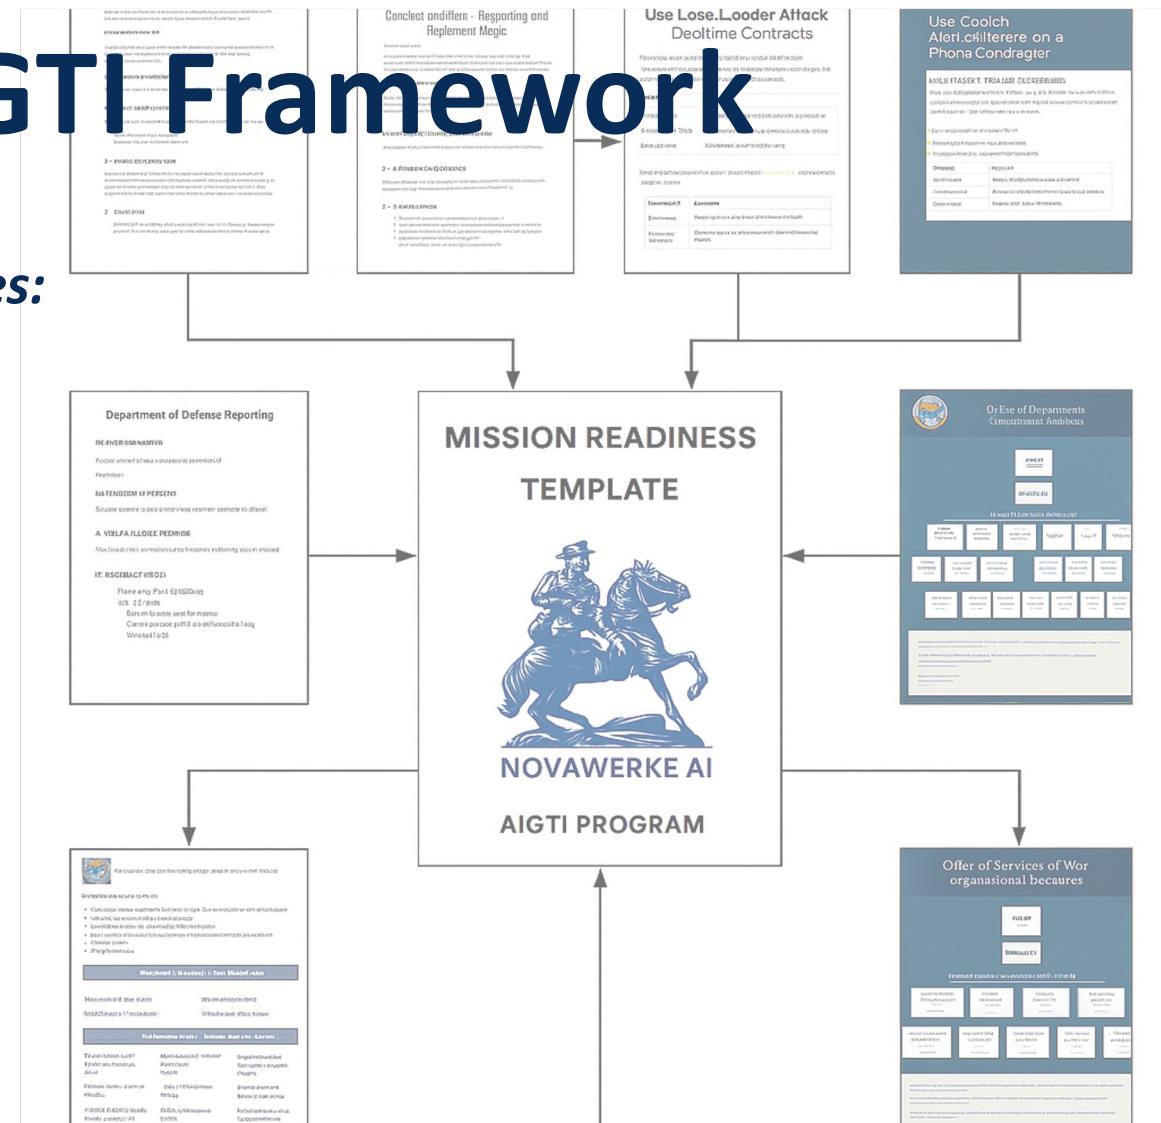

The AIGTI Framework

A standardized suite of templates:

- ❖ AI Inventory Schema
- ❖ Risk Register
- ❖ Model Card
- ❖ Waiver Workflow
- ❖ Acquisition Clause Pack

NOVAWERKE AI
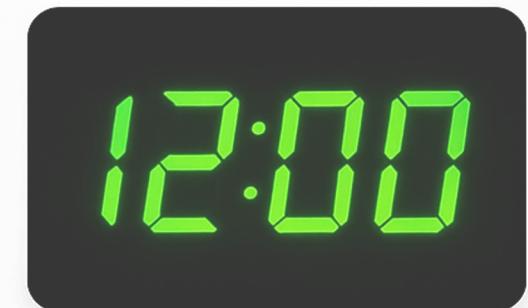

The 6-Week Diagnostic Sprint

Week 1–2
Discovery
& Gap Analysis

Week 3–4
Template
Alignment

Week 5–6
Readiness Scoring
&
Recommendations

Efficiency, Savings, and Confidence

⏱️ Faster Readiness — Audits in weeks, not months.

💰 Federal Savings — Reduced duplication.

🛡️ Reduced Risk — Transparent, operational consistency.

💼 Trained Workforce — Ensures expert operational execution.
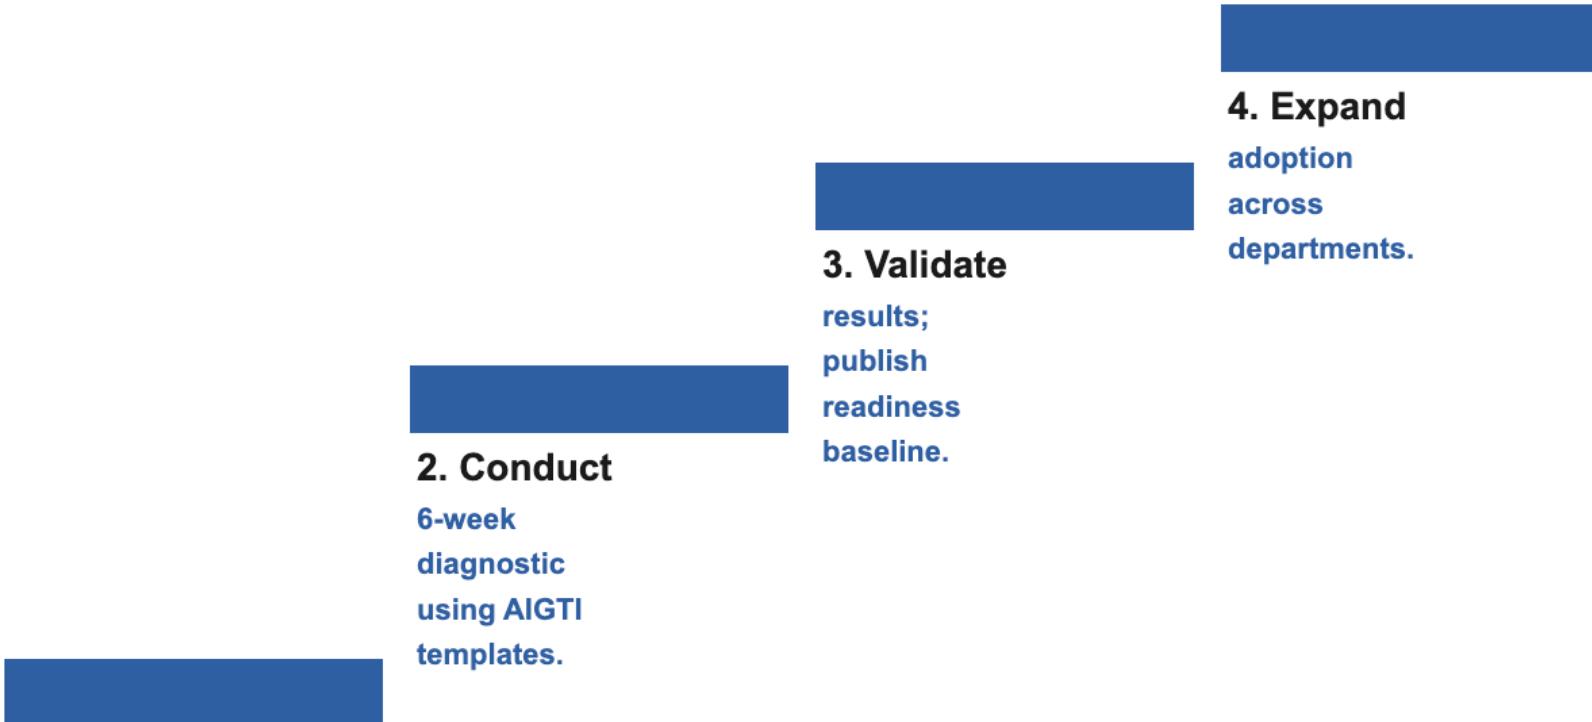

Novawereke AI's AIGTI will ensure that the United States of America - not fragmented vendors - define how AI is implemented, innovative, and effective.

Strengthening American Control Over Its AI Future

Pilot → Adoption → Standardization

4. Expand
adoption
across
departments.

3. Validate
results;
publish
readiness
baseline.

2. Conduct
6-week
diagnostic
using AIGTI
templates.

1. Select
pilot
agencies.

Partnership for Federal Efficiency

Novawerke AI requests the opportunity to brief agency leadership and demonstrate AIGTI's value.

AIGTI delivers mission readiness, risk reduction, and American leadership in artificial intelligence.
